

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

ESTE INFORME CONTIENE INFORMACION MUY IMPORTANTE SOBRE SU AGUA DE BEBER. TRADUZCALO O HABLE CON ALGUIEN QUE LO ENTIENDA BIEN.

Monitoring Requirements Not Met for Aqua Pennsylvania, Inc. - Lake Latonka

Our water system violated a monitoring requirement in 2017. Even though this was not an emergency, as our customer you have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the time period of August 8 through August 14, 2017, we did not complete all of the monitoring for haloacetic acids and therefore, cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time. You may drink the water. This is not an emergency. If it had been, you would have been notified immediately.

The table below lists the contaminant we did not properly test for, how often we are supposed to sample for haloacetic acids, how many samples we took, when samples should have been taken, and the date on which follow-up samples were taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When all samples were taken
Haloacetic Acids	Annual	2	8/8/2017 - 8/14/2017	8/9/17 & 08/30/2017

What happened? What was done?

We are required to collect samples in our distribution system for disinfection byproducts, which include haloacetic acids, each year between August 8 and 14. The samples were collected properly and within the required time frame and sent to our laboratory. However, the haloacetic acid sample could not be analyzed due to an instrument failure. As required, we recollected the samples within the same month on August 30, 2017, and satisfactory results were received on September 8, 2017.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail. For more information, please contact:
